

PUBLIC UTILITY DISTRICT NO 1. OF KITTITAS COUNTY – SCHEDULE 1015

Commercial Service – Unmetered Customer Owned Equipment

Availability:

Available to customers who have commercial equipment authorized to be located on or near District poles with fixtures rated less than 15 amps 120V (8 amps 240V) or 1500 watt nameplate. Some typical equipment might include cable TV amplifiers, sign lighting, traffic signals, wireless radios, wifi or cellular equipment. Placement including addition or expansion of such unmetered equipment on District poles must be approved by the District in advance of field deployment. The District reserves the right to change or revoke the terms, conditions, and rates for unmetered commercial service, in which event the customer(s) may receive service under the provisions of another metered rate class offered by the District.

Applicability:

Unmetered service is available to commercial users that desire to locate electric equipment on or near District poles in accordance with applicable codes and District approved pole-space mounting. The service billing includes a facility charge and an energy rate. For equipment the energy rate is based upon 100% nameplate of the connected equipment. Average amp readings will determine energy rate if nameplate is unknown. For security or decorative lighting the energy rate is based upon the annual burning hours for this region (4360 hours annually = 363 average monthly hours or 50% of max billing cycle hours). Equipment and lighting is ineligible for unmetered service if unsafe, inoperable, damaged or determined to cause disruption to District facilities or other District customers.

Calculations:

$P(\text{Watts}) = I(\text{Amps}) * V(\text{Volts})$
Monthly Energy = (Watts / 1000) * Billing Cycle Hours
Equipment max billing hrs = 24 hrs * 30 days = 720 hrs
Light burning hrs for region = 4360 hrs
Avg billing hrs for lights 363 hrs

Type of Service:

Single phase at available secondary voltages, 120 or 240.

Monthly Rate:

Facility Charge \$13.50/month
 Energy Charge..... \$.0950/kWh (see appropriate column in tables below)
